

In the Drawings

Applicant submits concurrently herewith, seven (7) ***Replacement Sheets***, Figures 1-7.

The enclosed ***Replacement Sheets*** supersede the original drawings filed by Applicant on July 28, 2003.

Applicant notes that in the previous set of drawings, the “Rules Engine” in Figures 5-7 was mislabeled as element 26. Applicant has corrected the drawings so as to be consistent with the specification by labeling the “Rules Engine” as element 28 in Figures 5-7. Support for this change to the drawings is found throughout Applicant’s original specification including, but not limited to, paragraphs [0058] through [0060].
